Sir:

Applicant, by the undersigned attorney hereby responds to the Restriction

Requirement mailed on 30 April 2004.

The Restriction Requirement restricted the claims to either Group I directed to Claims 1-5 or Group II directed to Claims 6-9.

In fact, concurrently with the filing of the above Divisional Patent Application, Applicant filed a Preliminary Amendment which canceled Claims 1-5 and amended Claim 6 and maintained Claims 7-9 in their originally filed form.

The undersigned attorney did not understand why a Restriction Requirement was sent and called the Examiner on 12 May 2004 to determine why a Restriction

MR2663-32/DIV
Appln. No. 10/695,983
Response to Office Action dated 4/30/2004

Requirement was mailed since Claims 1-5 were canceled and a Preliminary Amendment amending Claim 6 and maintaining Claims 7-9 was filed.

The Examiner returned the undersigned attorney's phone call on 13 May 2004 indicating that there apparently was some problem in scanning the Divisional Patent Application as filed and that all he had was the Divisional Application with no Preliminary Amendment showing.

The undersigned attorney is not certain where the Preliminary Amendment is in the system of the USPTO and, although understanding there is a scanning problem, does not know what happened to the Preliminary Amendment.

Attached to this Response is a photocopy of the Receipt Postcard showing the filing of the Divisional Patent Application and the Preliminary Amendment for a large entity Applicant (Exhibit A).

Additionally, attached is the Preliminary Amendment (Exhibit B) which was filed with the Divisional Application on 30 October 2003.

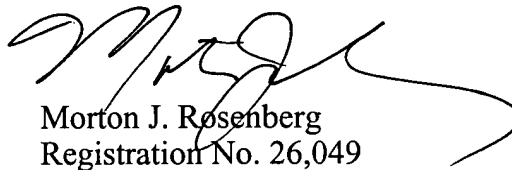

It is respectfully requested that the Restriction Requirement be withdrawn and the Preliminary Amendment be entered (if it already has not been entered in this case).

By the Preliminary Amendment, Claims 1-5 have been canceled and the only claims are Claims 6-9 as amended by the Preliminary Amendment.
